County Dairy Day Draws Capacity Crowd; Local Dairymen Featured

A panel of four outstanding County dairymen aired their views Tuesday on feeding programs, housing, breeding efficiency, automation, and the outlook for dairy farming in the county.

Climaxing the all-day, county dairy program at the Guernsey Sale Pavilion, Mrs. Herbert Royer, 2025 Oregon Pike; William Arrowsmith, Peach Bottom R1, J. Mowery Frey, Jr., 401 Beaver Valley Pike; and Rohrer Witmer, Willow Street R2, responded to questions from moderator Joe Taylor, chairman, Penn State University dairy science extension.

Taylor, who earlier in the program had talked to the audience of more than 400 farmers on general herd management, related some of those problems to the local level by quizzing the panel members on their individual operations.

FEEDING PROGRAMS

The panelists were in general agreement on the objectives of their feeding programs, but varied in actual practice. They all fed at least some home-grown grains, hay and silage, and placed an upper limit on the quantity of grain any one cow would receive daily.

Each member, however, expressed the need to know and

observe one's individual animals, and feed them according to their needs.

None of the panelists was a strong advocate of "lead feeding", in fact, one member stated he didn't believe in it at all. There was general agreement on feeding large amounts of forage, and several members reported they did not limit forage to increase grain consumption.

BREEDING EFFICIENCY

All the panelists reported they were generally able to get cows settled on the first service at least 60 percent of the time, although one dairyman

Red Rose DHIA Lists January Milk Records

According to the January news letter released this week by the Red Rose Dairy Herd Improvement Association, a registered Holstein cow owned by Charles Tindall of Peach Bottom R1, completed the highest 305-day lactation in the association. "Lucinda" produced 21,095 pounds of milk and 884 pounds of butterfat.

Second high cow completing a 305-day lactation was a registered

Amos Funk Honored At SWCD Banquet; Dubbed "Mr. Conservationist" By Group

OUTSTANDING CONSERVATION FARMER for 1966 award was presented to Elmer Good, Lititz R1, by County Commissioner Arthur R. Campbell, Jr., left, at the District's annual banquet.

L. F. Photo

Elmer Good Is '67 Conservation Farmer

Thursday night's banquet meeting of Lancaster County Soil & Water Conservation District Cooperators turned into a surprise testimonial to the county's leading conservationist.

Most surprised was the recipient of the honor, Amos H. Funk, who has served as chairman of the conservation district for the past 15 years.

He was praised for his efforts by Mrs. Henry H. Hackman, wife of the district vice chairman. On concluding the reading of a poem dedicated to Funk, Mrs. Hackman conferred upon him the unique title of "Mr. Conservationist of Lancaster County."

After receiving a scrapbook assembled by Henry Hackman, and hearing excerpts from contributors read — including praise from Governor Raymond Shafer — Funk thanked the 225 cooperators assembled at Hostetter's Banquet Hall in Mount Joy, and others who had participated in bestowing the honor.

"You know, I went out and begged by friends and neighbors to take the last 36 tickets I had for this affair. I assure them all I didn't know anything about this," the conservationist stated.

ELMER GOOD CITED

Elmer Good of Lititz R1 was presented with a plaque by

Potato Growers Informational Meeting Slated For March 14

A special informational meeting will be held next week, March 14, for potato growers. It will concentrate on production and storage practices, according to associate county agent Arnold G. Lueck.

Beginning at 9:15 a.m. at the Lancaster Farm Credit building, the meeting is scheduled to run until 3 p.m.

Specialists from Penn State

University, and their subjects, include: Elmer Pifer, varieties, soil tests and weed control; Carlton Taylor, field and storage disease control; Joe McCurdy, a ventilation control system for potato storage; Henry Menusan, insect pests and their control.

A good part of the afternoon session will be devoted to research agronomist Joe Harrington's presentation of preliminary research results on new varieties and fertility studies now in progress.

Farm Calendar

March 13—1 p.m., Lancaster County Swine Producers Assn. Spring Carcass Show and Evaluation Contest, at the Lancaster Stock Yards.
—7:30 p.m., Amish-Jersey 4-H Dairy Club, at Lancaster Farm Credit building.

Lancaster, First PFA Group With 1000 Members

Lancaster County Farmers' Association became the first county affiliate of the organization to reach the 1000-member level, according to an announcement last week by the Pennsylvania Farmers' Association.

The local group has been growing steadily, it was reported, and last year became the top membership county in the state at 947. This compared with 818 the year before, and 750 in 1964.

County association membership chairman Clarence Stauffer of Ephrata R1 announced a goal of 1100 members before the end of 1967.

Weekly Poultry Report

Eastern Pennsylvania And New Jersey WEEKLY SUMMARY

LIVE HENS
Prices held unchanged on light hens in Penna., prices reflect condemnation deductions and no producer truck loading incentives. Offerings light for movement the next two weeks, ample to occasionally excessive by the end of the month. Some supplemental shipments again delayed from New York State and New England due to Tuesday's snowstorm in those sections. Demand for heavy hens light. Offerings were fully adequate and readily available in some instances. Prices paid at farm: Light Hens 6-7 1/4, M 6 1/2-7c, Heavy Hens 15-15 1/2c.

TURKEYS
Non-contractual, inter-company offerings fully adequate for the light overall buying interest. On flocks subject to hand grading by buyers, prices were 29 1/2-30c for small volume movement. On straight run movement most processing buyers were taking a wait and see attitude following moderate activity last week. Some unsettledness developed following of-

ferings at attractive prices for shipment from N.C. & Ohio. Isolate prior commitment noted, however on 11-13# hens for movement into early April at 32c per lb.

Fogelsville

March 7, 1967
(Prices paid dock weights, cents per lb, except where noted.)
Hens, Light 6-10 1/2, mostly 6 1/2-9; Hens, Heavy 12-23 1/2, mostly 15-21; Pullets 24-35 1/2, mostly 31-34; Roasters 25-34, mostly 30-33; Ducks 21-32, mostly 28-32; Doves 12-38, mostly 32-38; Turkeys, Hens 29-30 1/2; Rabbits 25-59, mostly 45-48; Guineas 84; Pigeons (per pair) 70-160; Jumbo Squab 90; Bunnies (per head) 110.
Total coops sold 370

Eastern Shore Exchange WEEKLY SUMMARY

Low average broiler and fryer live prices gained more than 1 1/2 cents this week to average 1754 cents per lb.
Prices paid ranged from a low of 160 cents on Wednesday to a high of 185 cents per lb on Thursday.

Sales for the week were also gaining strength as they reached 11 million head.

From Where We Stand . . .

The Solution To Pollution Is Everyone's Concern

Pollution, like conservation, begins at home. Every pollutant has a source, and we all make our contributions — some substantial, some small.

Pollution needs to be separated into two kinds: Air and Water. Although each is important, we're concerned here primarily with foul air. Yes, even in Lancaster County. And the closer you live to the metropolitan area, the more you will agree, we are sure.

On the grounds that air moves freely from state to state and across wide regions of the country, the federal government is probably on the verge of a sweeping control measure. Maybe this will be the ultimate solution to this growing problem. For certain it will unless local and regional communities get on the ball real soon.

A federal law is already putting pressure on the automobile manufacturers requiring new cars to be equipped with air pollution control devices on the exhaust systems. This is one area in which the federal government can act meaningfully, and must.

We've seen very little written about controlling excess exhaust on buses and trucks. With most of these emitting huge clouds of incompletely burned diesel fuel, controlling car exhausts and not truck and bus fumes would be an inadequate measure.

But air pollution is not someone else's problem. It is ours, it is here, and it has no way to get but worse. But we do have a choice — we can wait for Uncle Sam to step in with general solutions for specific cases, or we can make a beginning in each community, and encourage and support efforts at the state level.

If we continue to wait, the decision

will be made for us, and we won't like it!

★ ★ ★ ★ Congratulations, LCFA!

Our congratulations to the Lancaster County Farmers' Association membership committee for scoring another first for Pennsylvania's number one agricultural county.

According to a recent announcement by the state farmers' association, the county group became the first in Pennsylvania to reach the 1000-member level.

This magic figure represents approximately 20 percent of the commercial farms in Lancaster County. It is fitting that so many farm families in the Garden Spot should support this association which believes in freedom of decision for the American farmer.

The independent views of state and county associations of farmers are reflected on the national scene through the American Farm Bureau Federation. Detractors have labeled these views too conservative, and have charged AFBF with being in cahoots with large food chains, processors, and other industry giants, whom it is said will eventually enslave the American farmer.

AFBF and its state and county branches feel, on the contrary, that if any single force seeks to enslave and manipulate our farmers it is the federal government. These organizations figure farmers are better off taking their chances in the market-place than in Washington. They prefer that decisions affecting farmers be made by farmers, not by an entrenched bureaucracy. We heartily applaud that stand, and believe it may be the salvation of the American farmer. In fact, couldn't the whole country use a shot of that independent spirit about now?

Love and Justice

Lesson for March 12, 1967

Background Scripture: Luke 19:28 through 21:38. Devotional Reading: 2 Timothy 4:1-8.

A woman was counselling with her pastor and admitted that she was nursing a long-standing grudge against her neighbor. The neighbor had done something which she felt she could not forgive. "But don't you think God has forgiven her?" the clergyman asked. "Yes," replied the woman, "but then it is much easier for him to forgive!"

Many people seem to share this assumption that forgiveness is an easy task for the Deity. In W. H. Auden's Christmas oratorio, *For The Time Being*, a character remarks, "I like committing crimes. God likes forgiving them. Really, the world is admirably arranged." But it is not so: forgiveness is not easy for God or man — not if we take sin seriously.

Another Way

How does one handle the fact of sin? One response to sin is to refuse to forgive it. Another is to give the appearance of forgiving without really forgiving (to "forgive" without "forgetting"). Still another response to sin is to overlook it. The first and second responses take sin too seriously and the third doesn't take it seriously enough.

Surely there must be another way to respond to sin. There is to pay the cost of sin in redemptive love. This response takes sin seriously, but it takes love even more seriously. It acknowledges the terrible power of sin and does not overlook it, but it also recognizes that long-suffering love is even more powerful.

Someone has said, "You can not learn to forgive until you learn to judge." This may sound strange for many of us mis-

takenly understand forgiveness as the act of overlooking sin, of failing to take it seriously. This kind of forgiveness is little more than an indulgent pat on the head and an assurance that "it doesn't matter." It is, however, a worthless forgiveness. If my sin against you "doesn't matter," then your forgiveness is not worth much because it didn't cost you anything to give it. Only when my sin really matters, when it is painful to you, when it costs you something in pain or loss, is your forgiveness to me a precious thing, a gift I do not deserve.

What Justice Demands

So it is with the forgiveness of God. He does not "like forgiving" our sins. They are painful to him. He cannot overlook them. We sin so brazenly, flaunting our will so rebelliously before him, that he cannot fail to know and care. He does not smile indulgently and tell us not to worry. It is judgment he gives us and it is only because he judges us that his forgiveness is precious to us.

We see the pain of our sin reflected in the parable of the vineyard. There is pain in the failure of the tenants to acknowledge the owner of the vineyard. It does not belong to them, yet they act as if it did. ("This is my Father's world," we sing, but we act as if it really belonged to us.) There is pain in their constant refusal to heed his messengers. Even when he gives them every chance to do the right thing, they reject him. There is that greatest of pains in their rejection and fatal violence to his very own son.

Miracle of Forgiveness

God cannot overlook so much pain. He cannot make believe it never happened; his sense of righteousness will not allow him to do that. He must pronounce his judgment: "He will come and destroy those tenants, and give the vineyard to others."

It is at this same point, however, that God performs the greatest of all his miracles: having pronounced the judgment, he takes the price of that judgment upon himself and pays it. The destructive reality of man's sin is staggering; it cannot be denied. But the redemptive reality of God's love is even greater.

God gives us no cheap grace. It is a forgiveness that is precious because its price is great. Because he loves us, he judges us. Because he judges us, his love has the power to save us.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A., Released by Community Press Service.)

PANEL OF LOCAL DAIRYMEN at Tuesday's County Dairy Day are from left: Rohrer Witmer, J. Mowery Frey, Jr., William Arrowsmith, and Mrs. Herbert Royer. All panelists had herds averaging over 500 pounds of fat last year. Standing is Harry Mumma, president of the Lancaster County Guernsey Breeders Assn., who served as toastmaster.

● County Dairy Day

(Continued from Page 1)

said he had a somewhat lower conception rate than that last year, but had since corrected the problem.

All waited between 60-90 days after calving for rebreed-

ing, and allowed an eight-week dry period.

Although panelists reported individual cows might have a "bad quarter," now and then, none felt mastitis was a particular problem in his herd.

HOUSING SYSTEMS

While each dairyman listed some degree of automation in his operation, none was automated to a high degree. One Holstein breeder reported plans to expand herd size and to install extensive labor-saving equipment.

OUTLOOK

In looking to the future of dairy farming in Lancaster County, the group felt strongly that the family farm operations that have been so important to

this area will continue to dominate the dairy scene.

Most thought they would need to increase herd size moderately, and would have to automate somewhat in the future. There was general agreement, however, on the merit of continuing the effort to improve individual cow performance, rather than simply increasing herd size.

HERD HEALTH

Another speaker, Dr. Samuel Guss, Penn State University extension veterinarian, told the dairymen that the disease Infectious Bovine Rhinotracheitis, called IBR, or "Red Nose", is an increasing problem among dairy cattle.

"There is no good treatment," the veterinarian said,

Now Is The Time . . .

By Max Smith, Lancaster County Agent

To Plan For Strawberry Plantings

The planting of a new strawberry patch or field includes the very early setting out of the plants, in this area we refer to late March or early April depending upon weather conditions. Early set plants get a better start and develop more runner plants early in the season that are more productive than runners set late in the summer. An extension circular is available on strawberry production.

To Graze Cautiously

Livestock should be introduced to lush spring growth of forage grasses gradually; in the very near future some fields of winter rye or other grasses that come early in the spring will be making some growth. Good management states that the herd or flock should be allowed to graze these areas for not more than a half hour for the first several times and then only after consuming dry matter such as hay or silage. Serious bloat or digestive trouble may result.

adding that "where IBR is concerned, a health certificate is meaningless."

Guss advised any dairymen bringing new animals into their herds should isolate them for 30 days to be certain they weren't carrying IBR.

NEW MILK QUALITY PROGRAM

The veterinarian also told dairymen about a new milk (Continued on Page 6)

SMITH

will be allowed too much of the new growth early in the season.

To Recognize

The Value Of Nitrogen

It is difficult to say that one fertilizer element is more important than the others, but since nitrogen is responsible for plant cell development and greater plant size, I'd like to point out the importance of proper placement and usage. Plants such as the grasses and corn depend considerably upon the amount of nitrogen available. In most cases nitrogen will not remain in the soil from year to year as other elements do, thus means that supplies should be furnished annually for top yields. Growers are urged to become familiar with the place of sufficient nitrogen for expected yields.

**Area Livestock Dealer
Fails To Pay \$25,000,
USDA Charges**

H. Eugene Gish, Elizabethtown livestock dealer, has been charged with failing to pay for

Livestock, the U. S. Department of Agriculture announced Monday. The USDA's Packers and Stockyard Division charged

Lancaster Farming, Saturday, March 11, 1967—5

that Gish failed to pay the full purchase price of approximately \$25,000 for 99 head of livestock purchased in August 1966, in violation of the Packers and Stockyards Act.

Gish will have an opportunity for a formal hearing on the charges, after which the USDA Judicial Officer will determine whether the evidence supports the charges. Until the case is settled, the P&S Division will discuss the charges and the evidence only with Gish or his representative, USDA said.

**Barry Garber
Named Manheim
Star Farmer**

Barry Garber, Manheim R1, received the Chapter Star Farmer award last Friday night at the Manheim FFA Chapter picnic and son annual banquet. Named Star Greenhouse was Glenn Sauder of Manheim R3.

Other awards presented to chapter members at the affair held at the Perin Fae Hall were Poultry Farming, Russell Adamme, Soil & Water Management and Agricultural Mechanics, to Jay Fisher, Dairy Farming, John Nissley; Public Speaking, John Lefever; Crop Farming, Martin Shearer; and Livestock Farming, Norman Burkholder.

In the State Project Book competition, gold medals and trophies went to Norman Burkholder for beef fattening, and to Ben Nolt for a six enterprise project book. Martin Shearer received a silver medal and trophy for swine fattening.

Sam's chain girls went to Burnell Buchen, Glenn Sauder, and Rick Fenstermaker.

John Nissley will receive an FFA jacket for being high salesman in the seed sales campaign.

Honorary Chapter Farmer membership was given to Lester Gehman, operator of G&G Feed & Supply, Inc. A certificate of appreciation was presented to Manheim Guidance Counselor Miss Theora Bishop.

**State Landrace
Show & Sale
March 18th**

The Pennsylvania Landrace Swine Breeders Association will hold a show and sale of 50 head of bred and open gilts, and boars, on Saturday, March 18. The statewide event will be held at Martin's Sale Barn, Blue Ball.

The show, which will begin at 10 a.m., will be judged by livestock extension specialist Dwight Younkin. Auctioneer for the sale, beginning at 1 p.m., will be Paul Z. Martin.

Also on the program will be Eugene Benedict from Culvert, Indiana, representative of the American Landrace Assn.

Serving on the state board of directors from Lancaster County are Raymond H. Weaver, New Holland R1, and James Z. Martin, Christiana R1. Martin is also secretary-treasurer of the state association.

SMALL EGGS — GOOD BUY

Small eggs are often a good buy, says Herbert C. Jordan, extension poultry specialist at Penn State University. Small eggs are of high quality, and if available at 40 cents a dozen, they are equal in cost to large eggs selling for 51 cents a dozen. Three small or pullet eggs are about the same as two large eggs.

Don't plant for the BIRDS!

See us now for **ORTHO®**
**Bird
Repellent**

Crows, blackbirds, pheasants — any bird that steals seed won't come back a second time for seed treated with ORTHO Bird Repellent. They spit it out and fly away. It's easy to get this kind of protection for your seed. All you do is pour this repellent right in with the seed in your planter box.

Actually, you're getting more than bird protection with this product. The full name is ORTHO Bird Repellent and Seed Protectant. It also contains an insecticide to control soil insects such as wireworms, seed corn maggots and corn rootworm. And a fungicide for extra protection against diseases like seedling blight, damping-off, and seed decay.

This is the only bird repellent that combines all these protections. So this year, don't plant for the birds. When you get your seed, ask us for ORTHO Bird Repellent.

4-H NEWS

TWO MORE 4-H CLUBS REORGANIZE NEXT WEEK

With most 4-H community Clubs scheduling reorganization meetings during March, two more were announced for next week by assistant county agent Victor Plafow.

On Monday, March 13, the Appleton-Joy 4-H Dairy Club will meet at the Lancaster Farm Credit building at 7:30 p.m.

The Elizabethtown-Dorrego Community Club will hold its annual meeting at Dorrego High School at 7:30 p.m.

Plafow reminds all youngsters between the ages of 9 and 19 that they are eligible for 4-H club membership.

DEMONSTRATION SEEN AT CENTRAL TRACTOR MEET

by Lynn Royer, reporter

Three demonstrations and a film highlighted the meeting of the Central 4-H Tractor Club Tuesday evening at Landis Bros. Farm Machinery Co., Lancaster.

Dan Martin, Manheim R1, and Rick Kreider, Manheim R3, demonstrated "Why Change Motor Oil Regularly." Jeffrey Risse, Leola R1 demonstrated "How to Tell When There Is Water or Dirt in Crankcase Oil." Lester Landis, Lititz R3, demonstrated "How Quick Your Reflexes Are."

Members were shown a film on carburetors and fuel injection.

The next club meeting will be held March 14, at 7:45, at the L. H. Brubaker Farm Equipment Store, Strasburg.

COUNTY 4-H GUERNSEY CLUB REORGANIZES

by Jesse Lee Balmer, reporter
In its first session of the

new year, the Lancaster County 4-H Guernsey Club met at the home of Raymond and Louise Witmer, Willow Street R1. Thirty-four members were on hand to elect the club's new officers.

Elected were: president, Earl Muhl, Quarryville R1; vice president, Nelson Landis, 1804 Hampstead Rd.; secretary, Candy Beneman, Strasburg R1; treasurer, Randy O'Connell, Kirkwood R1; reporter, Jesse

Lee Balmer, Lititz R4; game leaders, Joyce Stoltzfus, Ronks R1, and Steve O'Connell, Kirkwood R1; song leaders, Cynthia Balmer, Lititz R4. Representatives to the County Council were Leola Lapp, Kirkwood R1, and Joyce Stoltzfus.

Members voted an annual per member dues rate of 75 cents.

The next meeting, to which parents of members are invited, will be held April 12, at 7:30 p.m., at Witmer's.

quality regulation which could effect them if their milk was shipped interstate.

By July 1, 1967, any dairy-men shipping milk with a white blood cell count in excess of two million per milli-

liter of milk will be in trouble, Guss said.

He noted, however, that high producing herds seldom have any trouble with this problem. He said that generally cows milking over 325 days and giving less than 20 pounds of milk are the prime sources of these excessively high counts.

Officials Ask Regional Cooperation In Solving Water & Land-Use Issues

Growing townships and counties may best solve their sewage and water supply problems by joining forces and working together on a regional level, a study conducted by Penn State University reveals.

The study, conducted in central Pennsylvania by the University's Institute of Public Administration, points out that elected officials favor an area-wide approach in solving land-use issues. However, they declined to accept the idea of the formation of a regional government to tackle area planning problems.

These conclusions were obtained from interviews with township supervisors, borough council members, planning commission personnel, and wa-

ter company representatives in the six political subdivisions of the Centre Planning Region.

According to William M. Carroll, extension economist in public affairs at Penn State, the study indicates that it doesn't appear very practical for different water companies to compete with each other for new sources of water in the same general area. This is also true when dealing with sewage treatment issues.

Carroll, who assisted with the public issue project in cooperation with Dr. Edgar C. LeDue, assistant professor of political science at Penn State, pointed out that data from this study are applicable in other communities because the problems in this area are typi-

cal of those in many regions of the Commonwealth.

"Dwindling water supplies and the need for increased sewage treatment facilities have become major issues in planning for future growth," Carroll noted.

Municipalities should cooperate with one another on main land-use issues while working within the framework of their local governments, the majority of officials interviewed said. When one large governmental unit is formed, local citizens become less effective in having a voice in a decision. All officials, however, were in favor of the formation of boards, commissions, and authorities for area cooperation on individual problems.

"During the past six years, much of the Commonwealth has lost a year's supply of rainfall because of drought," Carroll said. "Pennsylvania, on the

other hand, has many sources of underground water supplies that, if tapped, will give communities sufficient amounts of water for many years."

The main problem, he said, is financing the exploration for underground sources then using funds to construct new water and sewage treatment facilities. Area approaches to these problems may be much more feasible.

Carroll said the Institute carries out studies which provide information useful in conducting educational programs dealing with land-use planning issues.

FEBRUARY FARM PRICES INDEX DECLINES 19.

The February Index of Prices Received by Pennsylvania Farmers in the state, and in the U.S., declined 3 points (1 percent) from the January index, according to the Pennsylvania Crop Reporting Service. Declining milk and egg prices were largely responsible for the drop, as the crop portion of the index was stationary.

Grain and hay prices were generally steady to lower, with wheat dropping 7 cents to \$1.58 per bushel. Other crops showing declines were soybeans, down 3 cents, hay, down a dollar, and potatoes down 15 cents. Corn, oats and barley were steady, and soybeans gained 3 cents.

Prices received for livestock and livestock products dropped 2 percent, despite a substantial increase in meat animal prices. The major causes for the drop were 5 cent declines per hundredweight of milk and per dozen eggs.

The only decline in meat animal prices was hogs, which, at \$20.70, were 30 cents below the previous month and \$7.90 below a year earlier. Major increases were noted for slaughter cows, up 80 cents, calves, up \$2.40, and lambs, up 40 cents. Steer and heifer prices averaged 10 cents higher than the previous month, but \$1.00 below a year earlier.

The index of poultry and egg prices was down 12 points (8 percent), despite the continuing recovery of broiler prices, which averaged a cent and a half higher. Farm chicken prices were off a cent and eggs, at 36 cents per dozen, dropped a nickel below the previous month and 9 cents under a year ago.

Season For Hiring Farm Workers, Local Employment Mgr. Says

Persons interested in year-round permanent farm jobs were reminded this week by Bernard V. Kelly, manager of the Lancaster office of Pennsylvania's Bureau of Employment Security, that this is the season when farm operators recruit such employees.

At the same time, Kelly urged farm operators seeking full-time workers to make their needs known to the office at 225 North Lime Street, as soon as possible.

He stated that he already has a listing of farm job openings throughout the state. According to the manager, many of these include suitable housing for farm workers and their families. Among the openings listed are jobs for general farm hands, dairy farm hands, poultry farmers, orchard workers and a few for stable hands for horse farms, Kelly added.

The official said that the local office will assist farmers in recruiting needed workers for all types of farm occupation. The bureau's Farm Labor Service also offers this assist-

ance for the recruitment of skilled professional and technical personnel for "off-farm" agricultural occupations.

Honan Charges N.Y. Producers Seek To Change Phila. Milk Order

"The true interests of the New York-based milk cooperatives in seeking a change in the milk order for Philadelphia have finally been revealed," Dr. James E. Honan, general manager of Inter-State Milk Producers' Cooperative charged, "to be the funning-off to their own farmers the richful income of Delaware Valley milk farmers who have served the Philadelphia area for many, many years."

Honan asserted that the real intention of the New York-based cooperatives has come to light in except ions just filed in Washington with the U. S. Department of Agriculture.

"Proposed order changes would permit more dumping of surplus milk from outside sources than the present order allows," Honan points out. "Yet the Eastern Milk Producers Association, Syracuse, has requested, in a brief just filed, provisions which would permit even more dumping of surplus milk in the Delaware Valley area."

The Dairyman's League Cooperative Association of New York and the Northeast Dairy Cooperative Federation, Syracuse, have taken parallel positions, in their affidavits presented to the USDA as comments to the recommended decision.

"Even without further inroads as requested by the New York based cooperatives," Honan charged, "the Delaware Valley dairy producers will take an immediate loss of \$10,000,000."

For the last eighteen months Inter-State Milk Producers' Cooperative has been fighting to protect the income of milk farmers who market their milk under the handler pool system in the Delaware Valley. This fight has been against the USDA and several New York-based cooperatives Inter-State represents 3500 dairy farmers in the Delaware Valley marketing area, Honan said.

On June 8, 1965, the Secretary of Agriculture issued a directive to terminate the Delaware Valley handler pool marketing order. As a result of a protest by the Delaware Valley dairy farmers a hearing was held in October, 1965. The hearing lasted 24 days and 4500 pages of testimony were presented.

"Although the USDA announced that the Department had claimed it was not possible to enforce this Delaware Valley handler pool order when requested by farmers to enforce it, by October, 1966, the Department had obtained, in three separate courts, orders requiring the production of records in cases of suspected violations in the Delaware Valley marketing area," Honan continued.

"No indication or sign of any attempted enforcement has appeared to date."

Honan emphasized that "bankers, businessmen and industries of the Delaware Valley should be alerted to the possibility of this \$10,000,000 or more a year immediate loss of farm income," and explained.

Spring will reign over the weekend, says the weatherman, with temperatures averaging above the normal range of 49 to 30 degrees. Cooler temperatures are expected in the early part of the week.

Also in the early part of the week rain will reign. A possible 1/2-inch, or more, is looked for accompanying the cooler temperatures about Monday or Tuesday.

Successful people are those who either had or took a chance.

cage-master "A" frame provides automatic egg collection, manure removal, watering and feeding- it's new from anderson

Fast and easy
to install
No framework
or cross braces
to catch dirt

Plastic egg collection belt carries eggs to trays at end of each cage row.

Cage-Master is more than a cage operation. It's push button automation. SERVING ALL THE POULTRY INDUSTRY
ANDERSON BOX COMPANY INC. • INDIANAPOLIS INDIANA

BUTLER STOR-N-FEED®

SYSTEMS FOR FORAGE AND GRAIN

If all you get is "the blues" from shopping for a low moisture silage system, take a look at the big, white Butler Stor-N-Feed®.

Here's up to 1128 tons of "oxygen-free" storage for corn silage, or 620 tons for low moisture silage—plus Butler's exclusive, maintenance free breathing system. No breather bags to replace, no relief valves to let air in.

Efficient top unloader is easily serviced. Delivers more silage, faster, than bottom unloaders . . . and with only five horsepower.

Bright, white finish reflects heat—minimizes gas expansion.

Price for the Butler Stor-N-Feed® system? You'll be amazed. Thousands of dollars less than some systems. There's an equally efficient and economical system for high moisture grain, too. And Butler offers low-cost deferred payment terms and lease plans.

BUY NOW AND RECEIVE A CHECK FOR \$300

If you purchase your Butler Stor-N-Feed for forage between January 1 and March 15, 1967, you will receive a check for \$300 from Butler Manufacturing Company when construction is completed. If you buy a Stor-N-Feed for grain be-

tween January 1 and March 15, 1967, you will receive \$200 upon completion of the job. Buy now while products and construction labor are available—and receive a cash benefit, too!

See Us Soon for Complete Information!

● SWCD Banquet

(Continued from Page 1)
County Commissioner Arthur R. Campbell, Jr., and cited for his "contributions to conservation as a cooperator and as a district director for 12 years".

Good, who operated a farm north of Lititz for 38 years pioneered conservation farming in his area and interested many others in trying it.

RECOGNITION AWARDS

Other countians receiving awards from the District were: Gerald Dørlington, president of the Conestoga Valley Assn. and SWCD Field Day and Plowing Contest host in 1962 and 1965.

Isaac Gerb, a cooperator for the past six years whose 103-acre farm was the site of last

year's plowing contest.

Kenneth DePoe, an industrial arts teacher at Donegal High School who has been active in improving the Donegal Creek, and who was one of the founders of the Donegal Fish and Conservation Club.

Homer Graybill, an ardent Flying Farmer who was one of the first four directors of the District and hosted the 1966 County Conservation Field Day.

And Henry E. Givler, vocational agriculture teacher at Pequea Valley High School who served as secretary-treasurer for the District from 1960-1965.

CONSERVATION OF MORAL RESOURCES

Featured speaker for the evening was Dr. D L Biemesderfer, former president of Millersville State College.

On the subject of "Conservation of Our Moral Resources", Biemesderfer noted that land is a moral as well as a physical resource.

"Its preservation and improvement is a benefit to the future, and the conservation farmer leaves an example, an influence upon all who will see his efforts," he stated.

Another "moral resource is that of the contributing citizen — "and that doesn't refer only to paying taxes," he noted "The sense of obligation a man must feel to put more into his community and his land than he takes out — that's what makes a contributing citizen," the educator noted.

"Those who are contributors to the time and place in which they live make the future debtors to them," he added.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

FEATURING FISH

Take advantage of the Lenten seafood specials at your fish market for some tasty economical dishes. Serve fish in some of the following delicious ways:

- SPICY CLAM DIP**
- 1 3-oz. pkg. cream cheese, softened
 - 1 tablespoon evaporated milk
 - 2 tablespoons lemon juice
 - 2 teaspoons Worcestershire sauce
 - 1 teaspoon grated onion
 - 1 teaspoon horseradish
 - 1 tablespoon chili sauce
 - 1/4 teaspoon salt
 - 1 can (7 1/2-oz.) minced clams, drained

Blend cream cheese with milk; stir in remaining ingredients. Serve as a dip for potato chips or raw vegetables. Makes about 2 cups.

BROILED SALMON STEAKS

- 1 1/2 teaspoons grated lemon peel
- 1/2 cup lemon juice
- 1/2 cup salad oil
- 1 clove garlic, pureed
- 1 teaspoon sugar
- 1/4 teaspoon pepper
- 1 teaspoon salt
- 1/2 teaspoon oregano leaves, crushed
- 6 salmon steaks (about 2 pounds)
- 1 cup sliced stuffed olives

Combine lemon peel, lemon juice, salad oil, pureed garlic, sugar, pepper, salt and oregano leaves, blending well. Arrange salmon steaks on well greased broiler pan, 4 to 5 inches from heat. Brush well with sauce;

broil 3 to 5 minutes. Turn; makes excellent gravy for par-broiled potatoes. Recipe to 3 minutes longer, or until may be easily doubled to make salmon flakes with fork. Add 8 servings. Increase baking time to 30 minutes. Serves 6.

CHEESE BAKED FISH

- 1 pound frozen perch fillets, thawed
- 3/8 cup (1/2 of 10 1/2 oz. can) condensed cream of celery soup
- 3/4 cup dairy sour cream
- 3/4 cup shredded Cheddar cheese
- 1/4 cup shredded Cheddar cheese

Drain perch fillets on absorbent paper toweling; arrange in single layer in a shallow, 2-quart baking dish. In a 1-quart saucepan combine soup and sour cream, blend thoroughly. Add 3/4 cup shredded Cheddar cheese; heat over low heat, stirring constantly, until cheese melts. Spread mixture over fillets, bake in a preheated 375 degree oven 20-25 minutes or until fish flakes. Sprinkle with 1/4 cup Cheddar cheese; return to oven for 5 minutes or until cheese melts. Serve immediately. Makes 4 servings.

NOTE: Extra sauce from fish

TUNA CHOWDER

- 2 onions, sliced
- 1/4 cup diced celery
- 2 tablespoons butter or margarine
- 3 medium potatoes, peeled and diced
- 1 teaspoon salt
- 1/2 teaspoon pepper
- 1/2 teaspoon seasoned salt
- 2 cups water
- 1 teaspoon grated lemon peel
- 2 tablespoons lemon juice
- 2 cups milk
- 1 can (7 oz.) tuna, undrained
- 1/2 cup grated Cheddar cheese

In saucepan, saute onions and celery in butter until soft. Add potatoes, salt, pepper, seasoned salt, water, lemon peel and juice. Cover and simmer 7 to 10 minutes or until potatoes are tender. Add milk, tuna, and cheese; heat until cheese melts. Serve at once. 5 to 6 servings.

SHRIMP-FOO YOUNG

- 1 can (4 1/2-oz.) shrimp, drained
- 1/2 teaspoon grated lemon peel
- 2 tablespoons lemon juice
- 1 cup drained canned bean sprouts
- 1/2 cup diced celery
- 1/2 cup thinly sliced onions
- 6 eggs, beaten slightly
- 1/2 teaspoon salt
- 3 tablespoons bacon fat or salad oil
- Soy sauce

Cut each shrimp into two or three pieces (unless they are small). Combine with lemon peel and juice, bean sprouts, celery and onion. Add to beaten eggs and salt. In hot fat in skillet, fry as pancakes about 1/4 cup mixture at a time, until light brown on both sides, turning once. Serve with soy sauce. 4 servings.

When you find mistakes in the newspapers, don't let it worry you. The editors try to get it right, everybody, and they know some people are never happy unless they can find something wrong.

FARM WOMEN GROUP 26 INSTALLS NEW MEMBERS

At the February 23rd, meeting of the Society of Farm Women, Group No. 26 two new members were installed. They were Mrs. Raymond Dorninger, 1772 Wendy Hill Road, and Mrs. John Brubaker, Manheim R2. The next meeting of the Group will be held at the home of Mrs. James Buckwalter, Lititz R2; members of Group 24 will be guests.

In other business matters, members voted to continue the Lancaster County Farm & Home Foundation as the county project; voted a \$15 donation to the Lancaster County Association for the Blind; and planned to donate used clothing to Christ Home, Paradise.

Farm Women No. 14 Hear Talk On Hawaii

Thirty-two members of the Society of Farm Women, Group No. 14, and six guests were entertained March 8 by illustrated talks on "Hawaii" by Mrs. Harry Houser and Mrs. Titus Burkholder. The meeting was held at the home of Mrs. Henry Rohrer, Strasburg R1. Hostesses were Mrs. Rohrer, Mrs. James Hall, Mrs. Arthur Groff, and Mrs. Laverne Mylin.

The group will be the guests of Society 13 at a luncheon meeting today at 1 p.m. at the Witmer Fire Hall.

There will be a food stand at the Shilling Sale, Covered Bridge, Ronks, on March 23 and 25. For food contributions, members are asked to contact Mrs. Raymond Barge, Ronks R1.

Contributions of \$10 each will be sent to crippled children and adult societies, and to the cancer society.

The next meeting will be April 12 at the home of Mrs. Muri Clark, Strasburg. Guests will be members of Society No. 1.

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

Salmon — Nutritious, Economical Main Dish
Serve salmon dishes as the main course in meals. It is an economical source of protein and low in calories. In addition to complete protein, salmon provides iodine, phosphorus, and vitamins A and D.

Serving tips for salmon . . .
Make salmon bunwiches — salmon filling in buns or on bread. Make open face style sandwiches for weight-watchers.

Oven dinners featuring salmon might be salmon loaf, potatoes, squash, and coleslaw for a crispy salad.

Salmon and potato patties are an ideal way to use leftover mashed potatoes.

Salmon salad with tomato wedges and hard-cooked eggs, topped with low-calorie French dressing is a lunch for weight-conscious people.

Two FFA Boys Share Grassland Chapter Award

An unusual "tie" was announced last night at the annual Parent and Son banquet of the Grassland Future Farmers of America Chapter.

The top award, Chapter Star Farmer for 1967, was shared by the president and vice president of the chapter — Adam Zimmerman and Robert Fisher. According to agriculture instructor Robert Herr, "the two outstanding boys were so close in the evaluating committee's

opinion that both really deserved the award."

Other FFA Foundation awards presented by Dr. Gene Love, agricultural education research professor at Penn State University, were: Star Greenhand, Nelson Weaver; Home Improvement, Douglas Houck; Farm Forestry, Douglas Musser; Farm and Home Electrification, Eugene Martin; Livestock, Larry High; Poultry, Mike Smucker; Farm Mechanics, Ken Weber.

Also, Soil & Water Conservation, Amos Reiff; Public Speaking, Merlin Snader; Ornamental Horticulture, Roy Musser; Crops, Eugene Bren-

die; Dairy, Linford Martin; Farm Safety, Galen Yoder; and Scholarship, Clair Weaver.

Recipient of this year's Leon Graybill Memorial Award was Leonard Gord. This award is given to an outstanding boy in agriculture each year for his academic accomplishments outside the agriculture curriculum. He is customarily selected by the Garden Spot High School faculty.

● DHIA

(Continued from Page 1)

Registered Holstein owned by Mahlon Shoemaker & Son, Oxford R1. She made 19,498 pounds of milk and 862 pounds of butterfat.

Two association herds tied at 67 pounds for the highest monthly butterfat average. The Dale E Hiestand herd at Bainbridge R1, 32 registered Hol-

steins, also made 1712 pounds of milk in January. The Edwin J. Landis herd of 34.7 registered and grade Holsteins averaged 1748 pounds of milk.

Runnerup in the butterfat averages was the 26.8 registered and grade Holstein cows owned by Isaac G. Geib, Manheim R3, with 63 pounds and 1755 pounds of milk.

NORTHERN CONSERVATION CLUB HEARS SOIL TALKS

by Curtis Horst, reporter
At its regular meeting Mar. 3 at the home of Harold Zimmerman, Ephrata R1, the Northern Lancaster County 4-H Soil and Water Conservation Club heard two talks on "Soil". Orval Bass, SCS county con-

servationist, spoke on "The Why of Soil Conservation"; Leon Martin, Stevens R1, and Dale Groff, Lititz R1, teamed up for a talk on "Animal Life in the Soil".

Members also saw a film entitled "Beyond Tomorrow". Vincent Hoover, leader, and some of the members of the Solanco conservation club also attended the meeting.

Clark Stautfer, Ephrata R1, was chosen to represent the club at the Lancaster County SWCD annual banquet on Mar. 9, his brother Ronald was named alternate.

The next meeting will be at the home of Melvin Wise, Eph-

rata R1, on March 17, at 7:30 p.m.

BROKEN BIT CLUB PLANS ANNUAL SHOW

by Debra Gregory, reporter
The Broken Bit 4-H Horse and Pony Club made further plans for their annual horse show scheduled for May 7, during their February meeting at the home of Debra and Jane Gregory, Lititz R1.

Jerry Nessinger was appointed in charge of the advertisements for the show. All ads must be submitted to Jerry by the end of March. The show will be held at the Mt. Airy Fire Hall Grounds. The rain date is May 14.

A new member, Debbie "Saddle Up." He gave the club members two informative booklets.

Requirement books from 1966 were returned to club members and new books for 1967 were distributed.

Refreshments were served by Mr. and Mrs. Robert C. Gregory. The next meeting will be Charles Phillips of Merck & Co., Inc., showed the movie, be announced later.
